NORTHERN KENTUCKY HOTEL

Enhancing Safety and Curb Appeal for Northern Kentucky Hotel

Northern Kentucky

The Challenge

A hotel in Northern Kentucky needed to replace damaged sidewalks, stairs, and exterior concrete areas to improve guest safety and overall curb appeal. The existing concrete had deteriorated, creating potential hazards and ADA violations.

Because the hotel remained open throughout the project, the client needed a partner who would maintain clear communication and minimize disruption to daily operations. At the same time, the solution needed to fit within the hotel's budget.

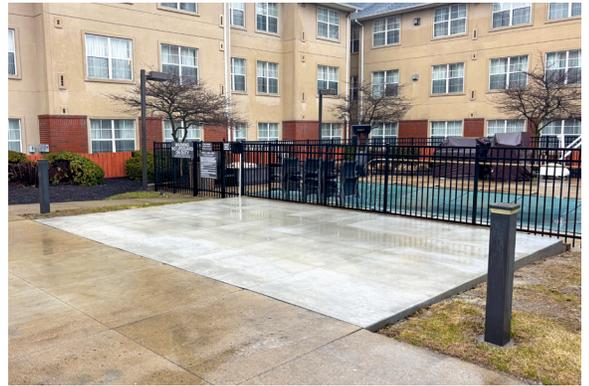

Our Approach

Quality Blacktopping + Concrete removed and replaced the damaged concrete with new, code-compliant sidewalks and exterior elements. From detailed stair work to patio areas and surrounding walkways, the team focused on precise finishing and a cohesive appearance that elevated the property's aesthetics.

Throughout the project, Quality maintained proactive communication, providing updates and coordinating schedule adjustments based on weather. By combining competitive pricing with dependable workmanship, the team delivered a solution that met the hotel's standards while staying within budget.

The Result

The improved sidewalks and exterior areas are now safer and more inviting for guests. The seamless execution, clear communication, and overall value earned the hotel's trust, leading to additional projects after the initial work was completed.

“Quality made the process seamless while we remained open for business, delivering safe, great-looking work on-time and on budget.”
